

# RV-02 MAX

- 240V 10A 2400W CIRCUIT BREAKER
- RCD FOR PERSONAL PROTECTION
- WEATHERPROOF TO IP55 WITH OR WITHOUT LEAD INSERTED
- ACCEPTS ORDINARY & HEAVY-DUTY LEADS TO Ø12mm
- H-CLASS - FOR COMMERCIAL USE
- AUTOMATIC CLEAT PREVENTS DISCONNECTION
- FOLD-OUT HOOK FOR HANGING
- PORTABLE – TAKE IT WITH YOU
- AUSTRALIAN STANDARDS APPROVED
- DESIGNED & MADE IN AUSTRALIA

## RCD + OVERLOAD

The Ampfibian® RV02-MAX is the ultimate power adapter for caravan/RV owners and tradesmen. Tough and weatherproof, it lets 15A devices connect legally to 10A power points and includes fast acting earth leakage safety protection.

Water resistant to IP55 (jets of water from all directions) and impact resistant to IK08, it is H-Class rated for commercial and light industrial use. The RV02-MAX works with ordinary and heavy-duty leads up to 12mm diameter.

Independently tested and certified, it meets or exceeds all applicable Australian Standards and recommendations.

<sup>1</sup> AS/NZS 3190:2011 "Approval and test specification – Residual current devices (current-operated earth-leakage devices)" which includes portable RCDs, and AS/NZS 3001:2008/Amdt 1:2012 "Electrical Installations – Portable structures and vehicles including their site supplies".

<sup>2</sup> Ampfibian will not convert 15A to 10A. Functionality of connected device may be limited if used to full capacity. Contact Ampfibian for further information.

<sup>3</sup> RCDs will not prevent shock but will minimise the effects.

## NO MORE DEATH LEADS

Death-leads are 10A to 15A leads with a 15A socket at one end, and an illegally modified plug on the other. Commonly used by tradesmen and caravan/RV owners, they breach all electrical standards and create potentially lethal electrical connections.

Household powerpoints can safely supply 10A, while 15A devices can draw up to 150% more than that. That is why 15A plugs do not fit into 10A powerpoints.

Many people are using illegally modified plugs to circumvent this protection, putting themselves, their property and the people around them at risk. Insurance does not cover damage caused by illegally modified equipment.

## SPECIFICATION

- Complies with Australian Standards<sup>1</sup>
- 10A 2400W circuit breaker<sup>2</sup>
- Residual Current Device (RCD) 30mA 10kA fault current<sup>3</sup>
- 220-240VAC 50-60Hz
- Ingress protected to IP55
- Impact rated to IK08
- Power input plug 10A on 1.8m lead
- Power output socket fits 15A plug
- Shipping weight 1.2kg (2.65lb)
- Shipping size 105 x 105 x 400mm (4.1"x4.1"x15.75")
- Product size without leads 350 x 90 x 108mm (13.75"x3.5"x4.25")

"The Ampfibian RV02-MAX is the premium adapter for people in demanding outdoor environments. Electricity and water don't mix, so why take the risk?"
