

Traxx Pro Rescue Blades

Multi Purpose Rescue Blades - 100mm to 400mm

THE ULTIMATE BLADE FOR ALL FIRE AND RESCUE APPLICATIONS.

The DBT technology diamond system allows excellent speed and life and will provide quick and efficient cutting of a diverse range of materials from concrete to steel. Simply awesome. Also available as the Traxx DBT rescue ringsaw blade.

DBT stands for DIRECT BRAZED TECHNOLOGY. This system allows the diamond to be directly brazed onto the respective tool.

DBT manufacturing is carried out in a vacuum enclosure to eliminate oxygen and deterioration of the diamond particles. This means higher grades of diamond can be used without deterioration.

Unlike sintered diamond technology, DBT means that the tool has a sharpness characteristic like no other diamond tools.

DBT technology allows for a much stronger bonding of the diamond to the tool holder, increasing greatly the initial impact resistance, thus allowing the cutting of such a broad range of materials.
